

Assignment 6: Python Loop

Question 1: Student Grade Calculator

Write a Python program that calculates a student's total marks, percentage, and final letter grade

based on their scores in Math, Science, English, History, and Art.

Requirements:

1. Prompt the user to enter the marks for all five subjects individually.
2. Convert each input into an integer.
3. Calculate the total marks obtained (out of 500).
4. Calculate the overall percentage.
5. Assign a grade: A (90-100), B (80-89.99), C (70-79.99), D (60-69.99), F (below 60).
6. Display Total Marks, Percentage (2 decimal places), and Final Grade.

Question 2: Even Numbers

Write a Python program to print all even numbers between 1 and 100.

Question 3: FizzBuzz

Write a Python program that prints numbers from 1 to 100.

- Print "Fizz" for multiples of 3.
- Print "Buzz" for multiples of 5.
- Print "FizzBuzz" for multiples of both.
- Otherwise, print the number.

Question 4: Multiplication Table

Write a Python program that asks the user to enter a number and prints its multiplication table from 1 to 10, except for even numbers, using a loop.

Question 5: Number Guessing Game

Write a Python program that stores the secret number as 25.

- Ask the user to guess the number.
- Keep asking until the correct number is entered.
- If the guess is too low, print "Too Low!"
- If the guess is too high, print "Too High!"
- When the user guesses correctly, print "Congratulations! You guessed the correct number."
